

Comprehensive Care for the Whole Child

At Hopebridge, we offer care across the board for children with unique challenges. Our center-based outpatient therapy model, grounded in an interdisciplinary approach since 2005, customizes services to your family, emphasizing occupational and speech therapy.

We empower children to succeed independently by building upon their skillsets and uncovering opportunities through specialized evaluations and early intervention. With our unwavering commitment to quality care and family involvement, we work toward successful clinical outcomes for all children.

Hopebridge Speech and Occupational Therapy

Why Choose Hopebridge Speech and OT?

CUSTOM CARE FOR YOUR FAMILY

Your child is more than just a diagnosis; they are a complete individual. We assess all facets of their life and development. Our outpatient therapy approach combines the knowledge of our multidisciplinary therapy experts to develop a tailored and integrated therapy plan. Each child has individual goals, and we work together to find the right blend that best suits your family.

A UNITED TEAM OF EXPERTISE

Our team of diverse specialists includes occupational therapists and speech-language pathologists. They all work together under one roof, promoting increased communication and enhancing the effectiveness of each therapy. This all-in-one approach simplifies the system for parents, eliminating the need for multiple therapy schedules and travel between various locations.

The Benefits of Interdisciplinary Therapy

Hopebridge's Speech and Occupational Therapy model offers superior advantages to equip children for success:

- Comprehensive developmental occupational pediatric therapy programs equip children for success
- Effective communication through speech and language therapy
- Alignment with insurance
- More control over variables to meet goals
- One-on-one therapy, with an emphasis on access to peer interaction
- A collaborative team approach that addresses the whole child
- A comfortable learning environment outside of the home that serves as a stepping stone to school

Integrated Therapies for Their Best Life

In our centers, you'll find a coordinated blueprint that emphasizes skill-building with:

OCCUPATIONAL THERAPY

Addresses sensory processing, coordination, and developmental delays for a child's success. Ongoing training keeps our therapists updated on the latest treatments.

SPEECH AND LANGUAGE THERAPY

Fosters effective communication, including oral motor control and AAC solutions for disorders like autism. Early intervention and innovative solutions ensure a brighter future.

FEEDING AND SWALLOWING THERAPY

Tackles challenges in children with ASD through behavioral, occupational, and speech therapies, ensuring proper nutrition. In our center-based approach, we build skills for a brighter future.
